IDENTIFIERS	Adult Education Act

ABSTRACT

These state profiles provide brief descriptions of the target population, services, and participants of state-administered adult education programs that are supported in part by funds authorized under the Adult Education Act, as amended. Profiles based on information taken from 1990 census data and from information included in the 1991 annual financial and statistical reports submitted by the states to the U.S. Department of Education are included for each of the 50 states along with the District of Columbia, Guam, the Northern Mariana Islands, and Puerto Rico. Each profile is organized in the form of seven tables summarizing the following program characteristics: target population (1990 census), funding (1990), enrollment (1991), level of effort, participant characteristics, participant achievements, and retention. INTRODUCTION

State Profiles for Program Year 1991 provide a brief description of the target population, services, and participants of adult education programs provided under the State-administered Adult Education program supported, in part, by funds authorized under the Adult Education Act, as amended.

The authorized funds are administered through the program of Basic Grants to States and are the major source of Federal support for basic skills programs. The purpose of the program is to provide educational opportunities for adults over the age of 16, not currently enrolled in school, who lack a high school diploma or the basic skills to function effectively in the workplace and in their daily lives.

The State Profiles have been prepared by the Program Services Branch, Division of Adult Education and Literacy and contain information taken from 1990 Census data and from information included in the 1991 (July 1, 1990 thru June 30, 1991) Annual Financial and Statistical Reports submitted by States to the Department of Education.
